Bellabeat Marketing Insights from Fitbit Data

Google Data Analytics Capstone Project

Luca Mariani
April 2026

Business Task

As a junior data analyst on the Bellabeat marketing team, I analyzed real-world Fitbit smart device usage data to understand consumer behavior around activity, sleep, and daily habits.

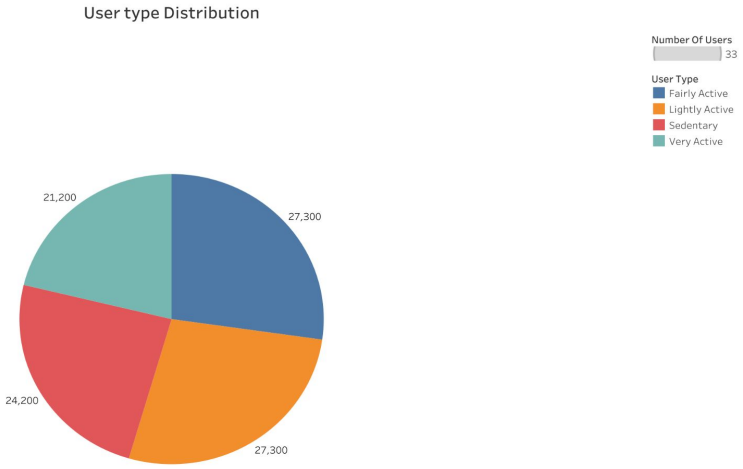
The objective was to uncover actionable insights that could help shape marketing strategies and improve user engagement with the **Bellabeat app**.

Dataset & Tools

- **Source**: FitBit Fitness Tracker Data (Kaggle, CC0: Public Domain)
  ~30 users, collected April–May 2016
- **Tools Used**:
  - BigQuery Sandbox (SQL) – data cleaning and analysis
  - Tableau Public – interactive visualizations and dashboards
- **ROCCC Assessment**:
  - **Reliable**: Medium (device data, small self-selected sample)
  - **Original**: Yes
  - **Comprehensive**: Low-Medium (good activity & sleep coverage, lacks demographics)
  - **Current**: Low (2016 data)
  - **Cited**: Yes
- **Approach**: Followed the Google Data Analytics framework
  Ask → Prepare → Process → Analyze → Share → Act

Key Insights

- Majority of users are **Lightly Active** or **Fairly Active** (27.3% each)
- Activity levels peak on Tuesday and Saturday, with a clear drop on Sunday
- Sleep tracking is used significantly less than activity tracking
- Strong opportunity to better integrate sleep and activity features in the app



Recommendations for Bellabeat

1. **Target Lightly Active Users**
   Focus marketing on gentle, achievable activity features in the Bellabeat app — such as mindfulness walks and light movement goals. Position the **Bellabeat app + Time watch** as the ideal wellness companion for women seeking balanced, non-intense routines.
2. **Improve Weekend Consistency**
   Activity drops significantly on Sundays. Introduce “Sunday Reset” features that combine light activity, sleep insights, and mindfulness to help users maintain engagement throughout the week.
3. **Promote Sleep + Activity Integration**
   Highlight how better sleep leads to higher daily energy and activity. Encourage consistent sleep tracking and bundle it with the membership program for personalized wellness guidance.
